

AquaConnect® Remote Pool Management System

The AquaConnect system connects Hayward's systems to the internet giving customers the ability to monitor and adjust pool settings.

With OnCommand you can turn on a heater, monitor pool temperature, turn lights on and off, activate waterfalls and more.

With the AquaRite Pro you can manage pH and sanitization to achieve and maintain perfect water chemistry.

With the AquaPlus and ProLogic Controller you can do what both OnCommand and AquaRitePro do.

The system can also maintain data records of pool pH, ORP and the salt levels for pool management records and printing.

Anything you can do from your pool controller, you can now do anywhere in the world. This level of control also enables you to reduce operating costs by keeping chemical use to a minimum, avoiding potential problems before they become major, and keeping heat low until you need it.

The AquaConnect web based Remote Pool Management portal is subscription free and can be accessed from anywhere on any computer.

You can also download the AquaConnect app onto your smartphone for complete remote control of the pool system.

Choose Hayward's TriStar™ for Top Performance and Features

Hayward's TriStar™ has the latest advances in heavy duty, high performance pump technology.

Exclusive features include a Tri-Lock lid for easy lid removal without tools, extra strong motor mounting bolts that cannot become damaged on over tightening and advanced impeller design to assure no loss of impellers during reverse flow situations.

TriStar™ offers the most advanced pump features designed with performance and value from the world leader - Hayward Pool Products.

A New Addition to the PSV Diverter Valve Line Up

Hayward diverter valves are manufactured with NSF certification in both PVC and CPVC options.

The diverter valves feature a patented handle design for quick customization of valve ports, easy-dial index handle for convenient flow setting and at-a-glance assessment and full-flow ports for maximum flow rate.

Hayward PSV Diverter Valves are compatible with Hayward's electric valve actuators as well as competitive brand actuators.

A new straight check valve has also been added to the PSV valve line up in sizes 1.5 inch through 2.5 inch.

Hayward Chemical Feeders Provide for Accurate and Carefree Chemical Feeding

Efficient and maintenance-free, Hayward automatic chemical feeders are available for residential pools and spas.

For use with trichlor or bromine only, these easy to use, Hayward automatic chlorinators and brominators are ideal for new or existing pools and spas.

Featuring the Easy-Lok™ threaded cover with finger release catch to provide extra security. Sizes starting at 4.2lb capacity and up to 30lbs are ideal for both residential and commercial applications.

The Hayward chlorinators operate automatically during filtration and have a user friendly control valve to accurately adjust the rate of feed.

ProHayward PAR56 LED Lamp Now Available

ProHayward is pleased to announce a 15W, 252 LED lamp in both RGB and white options.

The lamp body is manufactured of ABS and the lens is of polycarbonate sonic welded to assure leak proof design.

The 252 LED's offer bright lighting with long term performance. For the RGB version, color changing is through the on/off switch and the white light is suitable for commercial installations preferring traditional lighting.

Easy installation results in dramatic lighting effects and reliable performance with energy savings.
