## HCP 4000 Series Pump

The Hayward HCP 4000 Series Pump is designed for high flow and medium head applications.

Noryl®, provides a maximum strength-to-weight ratio. The pump features a large, non-corrosive plastic strainer basket that extends the time between cleanings and eliminates rust.

The transparent lid allows for easy inspection of the strainer basket, and its quick-release mechanism opens easily without tools. The TEFC motor design provides years of durable, reliable performance commercial pools, spas and water features demand.

Available in 5.5 to 12.5 HP for 60Hz and 7.5-12.5 HP for 50Hz.

## AquaRite Pro SD

*AquaRite Pro SD*

Building upon the industry-leading salt chlorinator, the professional grade AquaRite Pro SD takes pool and spa sanitization and chemistry automation to a new level.

Integrating chemistry automation with sanitization eliminates the need for an additional device on the pool system and lowers installation costs.

ORP and pH levels are automatically monitored with sensors, previously only available for commercial pools.

All AquaRite Pros come equipped with a T-15 TurboCell that automatically generates a self-renewing supply of fresh, pure chlorine — for water that's clean, clear and luxuriously soft.

The AquaRite Pro with its locking weather proof enclosure features a digital screen with easy to use touch keys.

The pH can be maintained using the Hayward AQLCHEM4 Liquid feed systems or any of the Hayward Z-Series dosing pumps.

The pool chemistry can be remotely monitored with an optional Hayward AquaConnect Home Network system.

# PROHAYWARD Blü Hi-Performance Filter Media

PROHAYWARD Blü is a fully recyclable hi-performance filter media that can be used in the sand filter system already in place. No more investment or adjustments needed. Simply replace the sand in the filter with the recommended quantity of PROHAYWARD Blü.

PROHAYWARD Blü is the lightest filter media available today. Sand is heavy especially when wet. No more struggling with heavy and dusty sand. Just one pound of PROHAYWARD Blü will do the job of 100 lbs of sand! This novel media also avoids the health risks of injuring workers that transport heavy loads of sand. And, because it is dust free, there is no inhaling silica dust as in filter sand.

PROHAYWARD Blü lasts longer than sand. Filter sand is made from quartz and silica which wear when exposed to flowing water. PROHAYWARD Blü will not degrade in flowing water.

*Cross section of standard Hayward sand filter with ProHayward Blü media*

Your pump will experience less strain because the PROHAYWARD Blü media provides very little resistance to water flow. For variable speed pumps, you can decrease your pump speed and still maintain the same circulation flow rate.

PROHAYWARD Blü is made of 100% recyclable material and can be disposed of where plastic bottles are recycled.

ProHayward Blü is sold in 1lb bags and is available in a master carton of 12 bags.

# Coates Electric Heaters

Coates has been the name to trust in quality and reliability in electric pool water heating equipment since the 1940s and continues to lead the industry in quality and performance. Hayward IMG is one of the main international distributors of Coates pool heaters.

The export model heaters are available from 12kW to 180kW and most can be ordered in single or three phase models. Heaters are also available up to 300kW for large commercial applications.

The heaters incorporate design features that increase service life, dependability and provide ease of servicing including corrosion resistant tank surfaces and low watt density incoloy elements as well as built-in flow switches to prevent operation when there is no water flow.

*For more information on the products featured in Newsplash, please contact Hayward/IMG at fax: 909.444.0327, email: [img@hayward.com](mailto:img@hayward.com) or go to [www.Haywardpool.com](http://www.Haywardpool.com)*
