

## HAYWARD® HYDRAPURE® AOP System For BETTER Sanitization

The new Hayward® **HYDRAPURE®** is an all-in-one design that is fast and simple to install with rotatable lid for easy access to the control pane.

First **Ozone** injected into the water inactivates organic compounds and stops chlorine byproducts from forming. Then **UV** light inactivates microorganisms. An Advanced Oxidation Process then combines UV and Ozone together form **Hydroxyl Radicals**.

The three sanitizers together destroy 99.9%\* of chlorine-resistant bacteria and viruses.

The process reduces chlorine required for effective sanitization, cutting chloramines by 50% to create softer, gentler water.

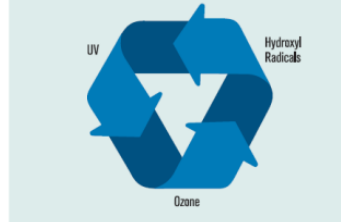

The **HYDRAPURE®** operates efficiently with low head loss at flow from 10-120 GPM without requiring a bypass with 80 gpm being the most optimum flow for maximum effectiveness.

Weather does NOT influence the effectiveness of the **HYDRAPURE®**.

An intelligent visual display makes it easy to monitor functions, bulb life and status.

## PARALEVEL™ AUTOMATIC WATER LEVELER

This innovative water leveler continually works to ensure that your pool or spa is at its ideal level with the level being monitored and adjusted automatically.

**Paralevel's** "posi-click" adjustment makes it easy to make a manual adjustment.

Paralevel offers "Smart-Sensing", which means it will ignore water sloshing in the pool as it only senses the pool's true level.

"SmartSensing" also protects **Paralevel** so it will not cycle on and off rapidly, like other levelers. This limits the potential for premature failure and eliminates loud water hammer that could lead to damage to plumbing.

# Hayward DynaSkin™ Skimmers - Low Profile and Virtually Indestructible

Hayward skimmers are the preferred choice of professional pool builders. The skimmers are manufactured to Hayward's rigorous quality standards.

DynaSkin™  
SP1091WM

Their durable, unibody construction is molded of rugged ABS, and they've been designed without submerged joints.

Hayward DynaSkin™ Automatic skimmers are non-corrosive skimmer packages designed for the gamut of above ground pool and some in-ground applications. A smooth, contoured body, combined with the advanced, patented weir, removes debris more completely and efficiently.

DynaSkin™  
SP1091LX

The low-profile design gives you the flexibility of maximum installation height on decks and ledges.

Hayward skimmers come with multiple plumbing connections for easier installations.

TEST POOL WATER  
DAILY AND MAINTAIN  
CHEMICAL BALANCE

Free Chlorine Level: 1 ppm - 3 ppm  
pH Level: 7.2 - 7.6

# SwimPro® VL Series - Ball Filters: The Secret to Crystal Clear Water

The value priced **SwimPro® VL Series** by **Hayward** ball high-rate sand filter range is manufactured in the United States: of rugged, durable, color-fast molded polymeric material to assure long life.

Available in 3 sizes for 6 m<sup>3</sup>/h, 10 m<sup>3</sup>/h and 14 m<sup>3</sup>/h flow rates, the filter includes the standard SP0714T Hayward multiport valve and features a high efficiency top diffuser and an innovative under-drain to assure balanced flow and maximized backwash performance.

Unique underdrain

The **SwimPro®** filter is virtually maintenance free and value priced thanks to advanced US manufacturing efficiencies.

## 2023 Buyer's Guide

# Coates - ELECTRIC POOL HEATERS

**Coates** has been the name to trust in quality and reliability for electric pool water heating equipment since the 1940s and continues to lead the industry in quality and performance. IMG is one of the international distributors for Coates Heaters.

The export model heaters are available from 12kW to 180kW and most can be ordered in single or three phase models.

These medium capacity pool and spa heaters feature a built-in flow switch to prevent operation when there is no water flow.

Heaters are also available up to 300kW for large commercial applications. The high capacity commercial pool installations incorporate design features that increase service life, dependability and provide ease of servicing. Corrosion resistant all stainless steel tank surfaces and low watt density incoloy elements provide long, trouble-free service life.
